PEACH BELT NURSERY,

BANGOR, MICHIGAN

John L. Cross, Prop.

7732.
Best By Test - Raspberries - HONEYSWEET - Finest quality of the blacks. Fruit large, glossy black, very sweet, superb flavor. Small seeds. Long fruiting season. A strong grower and resistant to disease.

BRISTOL - A newer variety. Good size and flavor. Ripens a little ahead of Honeysweet, but a shorter season.

REDS - LATHAM - Most popular Red for market and garden. Large firm berries, fine flavor. Strong grower.

SUNRISE - A newer Red ripening about a week ahead of Latham. Darker red, nice flavor.

PURPLE - "SODUS" - Largest of all the Raspberries and of excellent flavor. Make swell Jam. Extra heavy yielder. Lots of fruit over a long season. Very strong grower.

STRAWBERRIES - Blakemore and Premier for early fruit. Both are good. Premier somewhat earlier. Blakemore is the better Shipper. Quality about the same.

DUNLAP - Old timer but still one of the very best for quality. Good for canning and Freezing. Makes lots of plants. Swell flavor.

ROBINSON - (Sc. Beauty) - Extra large berries of fine flavor for table use. Not so good for canning or long shipments. Good plant maker. One fault - If you get lots of rain and hot days during picking season you will get some soft berries.

SPARKLE - A newer variety. Mid-season. Follows Dunlap. A long picking season. Berries attractive bright red, good flavor and firm. Yields well. Good plant maker. Highly recommended for freezing and canning.

EVERBEARERS - MARVEL has proven Tops for us with the finest flavor, mild and sweet. Good size. Also a good yielder and plant maker.

GEM - Best shipper of the Everbearers. Large fruit. Bears heavy and makes plenty of plants.

STREAMLINER - Little sweeter than the GEM, about the same sized berries. Nice flavor. Good plant maker.

GRAPES - Concord the best Blue for table, canning and Juice.

AGAWAM - Large, amber red color and has a "winey" flavor. Fruit about the same size as the Concord. Makes nice Juice.

PEACH BELT NURSERY (Since 1876)
